PLAYA WETLANDS

THE PRINCIPAL SOURCE OF AQUIFER RECHARGE

Kansas playas provide habitat for waterfowl and clean water for livestock. Playas also benefit people by filtering water and recharging the Ogallala Aquifer. Through workshops Ducks Unlimited has developed with partners, such as the Playas Lake Joint Venture, Kansas ranchers have learned how conserving their playas can enhance their operations.

Ducks Unlimited is working across the region to protect and restore these important wetlands so they can function properly and maximize groundwater recharge. Though playas alone cannot solve our regional water demands, their conservation will be a critical component of the solution.

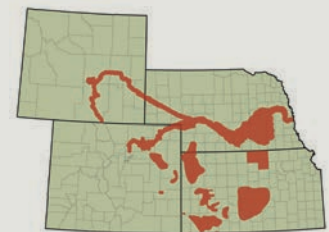

For more info about the Playas, contact: Abe Lollar, Biologist - Kansas • (620) 214-2693 or alollar@ducks.org

HEARTLAND HERITAGE AND HABITAT INITIATIVE

Through the Heartland Heritage and Habitat Initiative, Ducks Unlimited is enhancing, restoring and protecting critical migration habitat throughout Kansas. These shallow and seasonal wetlands provide an oasis for migrating waterfowl, other wetland birds and numerous non-migratory species. These conserved lands also help preserve our outdoor traditions and hunting heritage.
