NUMBER OF PROJECTS

TOTAL ACRES

North Dakota has 85 NAWCA projects either completed or underway. These projects have conserved 1,712,021 acres of wildlife habitat. NAWCA funding of more than \$61.6 million stimulated partner contributions of over \$86.6 million. These figures do not include multi-state projects.

CHASE LAKE AREA WETLAND PROJECT XII

This proposal is phase 12 of an ongoing project designed to protect, restore and enhance wetland and grassland communities, by using a landscape level planning approach. Although many of these wetlands have been protected, much of the surrounding prairie uplands have been converted to agricultural use.

The project will protect 33,039 acres through fee title, lease and easement acquisition, as well as restoration and enhancement activities. The Prairie Pothole Region annually produces 60-70% of the continent's grassland nesting (mallard, northern pintail, gadwall, blue-winged teal, northern shoveler, American wigeon, and green-winged teal) and over-water nesting (redhead, canvasback and ruddy duck) species of waterfowl, which will benefit from this project.
