TOTAL ACRES

Pennsylvania has 13 NAWCA projects either completed or underway. These projects have conserved 2,571 acres of wildlife habitat. NAWCA funding of more than \$1 million stimulated partner contributions of over \$2.6 million. These figures do not include multi-state projects.

PYMATUNING WMA WETLAND PROJECT

The Pymatuning Wildlife Management Area Wetland Project will restore 14 acres and enhance 624 acres of wetland habitat through work on the ground and installation or modification of water-control structures. Some of Pennsylvania's largest and most productive wetland habitats are found on Pymatuning WMA. Over the past 50 years, many of these wetland areas have impaired water level management capability. The inability to control water levels in these wetlands has resulted in plant communities dominated by invasive and aggressive species.

T Enhancement and restoration of wetland habitat as part of this project includes establishment of water-control structures to improve habitat quality and ensure management capabilities for optimal wetland conditions. Many species of waterfowl will benefit from restoration and enhancement activities of this project, including southern James Bay Canada goose, wood ducks, mallards, American black ducks and northern shovelers. Virginia and sora rails, American and least bittern and black terns also use the area.

	PROJECT NAME	GRANT AMOUNT	PARTNER AMOUNT	TOTAL FUNDS	TOTAL ACRES
1.	**ACCELERATING WETLAND RESTORATION ON PENNSYLVANIA'S PUBLIC LANDS	\$100,000	\$259,241	\$359,241	253
2.	FRENCH CREEK WETLAND INITIATIVE II	\$100,000	\$184,869	\$284,869	173
