NUMBER OF PROJECTS

TOTAL ACRES

*Tennessee has 38 NAWCA projects either completed or underway. These projects have conserved 68,855 acres of wildlife habitat. NAWCA funding of more than \$14 million stimulated partner contributions of over \$67.1 million. These figures do not include multi-state projects.*

## WEST TENNESSEE WETLANDS ENHANCEMENT PROJECT

In West Tennessee, six public and private partners developed a landscape approach to conserve wetlands and adjacent uplands in the Lower Mississippi Alluvial Valley and the East Gulf Coastal Plain. The project will protect 866 acres, restore 951 acres and enhance 624 acres on 14 tracts across several state wildlife management areas. This will begin to compensate for the loss of seasonally flooded wetlands due to agriculture and development in forested wetlands. It will enhance water quality, and reduce flooding and runoff, benefiting 20 priority species of migratory birds.
