

TEXAS NAWCA PROJECTS

\$49,790,069 **\$106,213,269** **96** **255,789**

NAWCA GRANT AMOUNT TOTAL PARTNER CONTRIBUTION NUMBER OF PROJECTS TOTAL ACRES

Texas has 96 NAWCA projects either completed or underway. These projects have conserved 255,789 acres of wildlife habitat. NAWCA funding of more than \$49.7million stimulated partner contributions of over \$106.2 million. These figures do not include multi-state projects.

TEXAS GULF COAST XIII

This proposal continues a 24-year partnership of private landowners, a private foundation, state and federal agencies and non-governmental organizations committed to the long-term support of wetlands conservation on the Texas Gulf Coast and will include projects across each of the three initiative areas in the Texas portion of the Gulf Coast Joint Venture (Chenier Plain Initiative Area, Texas Mid-Coast Initiative Area, and Laguna Madre Initiative Area). This proposal will restore and enhance an additional 2,519 acres of wetland habitat on private lands that will provide important migration, wintering, and breeding habitat for numerous species of waterfowl, shorebirds, wading birds and neo-tropical migrant songbirds.

This proposal will provide breeding habitat for black-bellied and whistling ducks as well as wintering/migration habitat for six high priority (mottled duck, northern pintail, mallard, lesser scaup, greater scaup, and Canada goose) and five other priority waterfowl species (redhead, canvasback, American wigeon, wood duck, and ringneck duck) and more than 30 NAWCA priority waterbird and landbird species.
