Idaho has 24 NAWCA projects either completed or underway. These projects have conserved 77,618 acres of wildlife habitat. NAWCA funding of more than \$10.8 million stimulated partner contributions of more than \$36.2 million. These figures do not include multistate projects.

UPPER SNAKE RIVER

Project objectives aim to offset impacts of current threats to avian resources and heighten the profile of the value of wetland conservation by 1) expanding permanent protection of 1,069 acres of wetlands and 699 acres of associated uplands around core wetland conservation areas and corridors through perpetual conservation easements acquired by Teton Regional Land Trust (TRLT) and the Bureau of Land Management that will enhance water quality, quantity and security of highly productive wetland areas; 2) enhancing 50 acres of emergent wetlands by Idaho Department of Fish and Game (IDFG) on the globally significant Mud Lake Wildlife Management Area (WMA) and 6 acres on two key permanently-protected parcels within core wetland conservation areas by private landowners and The Nature Conservancy and 3) leveraging capacity of TRLT and partners to galvanize support for wetland and waterbird conservation through community engagement initiatives, a goal of NAWMP. These initiatives are wide reaching, engaging youth, adults and teachers from across the region in tangible conservation efforts.
