\$79,800,069 **\$113,480,937** **101** **1,835,000**

NAWCA GRANT AMOUNT TOTAL PARTNER CONTRIBUTION NUMBER OF PROJECTS TOTAL ACRES

North Dakota has 97 NAWCA projects either completed or underway. These projects have conserved 1,814,012 acres of wildlife habitat. NAWCA funding of more than \$71.8 million stimulated partner contributions of over \$103.3 million. These figures do not include multi-state projects.

CHASE LAKE AREA WETLAND PROJECT XIV

This proposal is phase 12 of an ongoing project designed to protect, restore and enhance wetland and grassland communities, by using a landscape level planning approach. Although many of these wetlands have been protected, much of the surrounding prairie uplands have been converted to agricultural use.

One of the multi-agency planning objectives for the area is to maintain all native grasslands by acquiring perpetual grassland easements and protect wetlands by acquiring perpetual wetland easements.

With matching partner and grant funds from this proposal, 1,527 acres of native grasslands and 184 acres of wetlands will be secured as perpetual conservation easements. In the more fragmented portions of the CLP area, waterfowl nest success is typically below levels necessary to maintain populations. It has been determined that in order to maintain breeding waterfowl populations, between 30-40% of the landscape must be in perennial grass cover suitable for nesting. In portions of the CLP area, it is feasible to restore enough grassland to boost nesting success above maintenance levels. In this proposal, approximately 500 acres of cropland will be seeded back to grassland habitat that will enhance 50 acres of wetlands in the CLP area.

The 20 acres of wetlands being restored in this proposal will be within blocks of grasslands and/or surrounded by grassland easements providing additional wetland habitat within grassland nesting habitat. The 10,625 acres of managed grazing systems in grassland habitat will maintain and enhance upland nesting habitat that will enhance 1,179 acres of wetland habitat.
