

# SOUTH CAROLINA NAWCA PROJECTS

**\$61,290,806**

NAWCA GRANT AMOUNT

**\$394,867,384**

TOTAL PARTNER CONTRIBUTION

**82**

NUMBER OF PROJECTS

**369,880**

TOTAL ACRES

*South Carolina has 82 NAWCA projects either completed or underway. These projects have conserved 369,880 acres of wildlife habitat. NAWCA funding of more than \$61.2 million stimulated partner contributions of over \$94.8 million. These figures do not include multi-state projects.*

## SOUTH ATLANTIC WETLANDS & WILDLANDS I

This project will help meet the objective of the South Atlantic Migratory Bird Initiative (SAMBI) Implementation Plan as the project area is based on the Waterfowl Focus Areas from the Atlantic Coast Joint Venture Waterfowl Implementation Plan. Specifically, these projects will result in the permanent protection of 219 acres of wetlands and 760 acres of uplands as well as the enhancement of 445 acres of wetlands for a total of 1,424 acres impacted. The wetlands can be further classified by type. Of the 219 protected wetland acres, 115 acres are coastal marsh habitat and 69 acres are forested wetlands. The 445 acres of enhanced wetlands consist of managed tidal impoundments that will be managed to provide high quality emergent wetland habitat. The activities of this project will support populations of many different wildlife species, but the focus is on providing quality wetlands for waterfowl. The following high priority and other priority waterfowl species will be affected: Northern Pintail, Mottled Duck, American Black Duck, Mallard, Lesser Scaup, Greater Scaup, Wood Duck, Redhead, Canvasback, Ring-necked Duck, and American Wigeon. Another species that this project will benefit is the federally threatened Black Rail. Tracts 3 and 4 are both near epicenters of known Black Rail breeding populations and the importance of impoundments is specifically mentioned in the Eastern Black Rail Conservation Plan.
