Wisconsin has 126 NAWCA projects either completed or underway. These projects have conserved 193,468 acres of wildlife habitat. NAWCA funding of over $44.8 million stimulated partner contributions of more than $133 million. These figures do not include multi-state projects.

SOUTHWEST WISCONSIN CONSERVATION CORRIDORS

This project will protect, restore, and enhance more than 1,205 of critical wetland and riparian habitat and adjacent uplands within the Mukwonago and Fox River watersheds in Wisconsin to ensure long-term conservation of these ecosystems and their associated fish and wildlife. Protection, restoration, and enhancement of these lands will directly benefit wetland and grassland species to include: breeding habitat for waterfowl species such as American black duck, Northern pintail, and Wood Duck; foraging, nesting, and migratory stop-over habitat for many species of shorebirds, waterfowl, and waterbirds, such as American bittern, American woodcock, black tern, willow flycatcher, sedge wren, cerulean warbler; and nesting habitat for grassland bird species of concern, such as dickcissel, Eastern meadowlark, and Grasshopper Sparrow. This project also will provide potential breeding and migration habitat for Whooping Crane.
