

CLEAN WATER STARTS WITH YOU

Help keep Missouri waters safe.

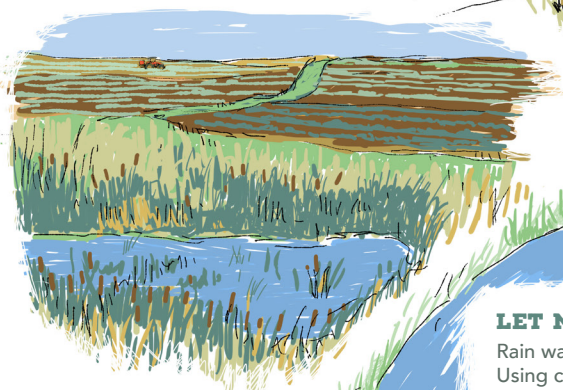

CONTROL YOUR INPUTS

Excessive fertilizer use degrades water quality. Apply fertilizer at the right time and in the right place.

MANAGE YOUR WASTE

Animal and human waste entering our waterways introduces harmful nutrients and pathogens. Control livestock access around water, pick up after pets, and maintain septic systems.

LET NATURE WORK FOR YOU

Rain water brings nutrients into our waters quickly. Using cover crops, wetlands, and rainscaping can filter nutrients to reduce impacts.

HEALTHY WATER MEANS HEALTHY COMMUNITIES!

- Healthy drinking water
- Safe places to swim, fish and enjoy the outdoors
- Better habitat for wildlife
- Less wastewater treatment needs
- Cost-savings for households

Harmful blue-green algae blooms impact Missouri waters each year due to nutrient pollution.
